

Bossier Parish Community College
Master Syllabus

Course Prefix and Number: TEED 101

Credit Hours: 4-3-3

Course Title: Basic Electricity and Lab

Course Prerequisite or Corequisite: MATH 099

Textbook(s): Fowler, R.J. Electricity: Principles and Applications, 8th edition. McGraw-Hill, 2013. ISBN: 9780073373768

Basic Electrical Circuits. Energy Concepts. ISBN: 1557561729

Course Description: Lecture and Lab in electron theory, basic circuits, cells and batteries, resistance networks, Ohm's law, Kirchoff's law, electromagnetism, alternating current, impedance, phase relationships, resonance, transformer, time constant principles, and use of measuring instruments.

Learning Outcomes:

At the end of the course, the student will:

- A. recognize and define fundamental terminology associated with basic DC and AC electricity such as voltage, current, resistance, power, magnetic field strength, and magnetic flux density;
- B. measure and record physical parameters such as voltage, current, resistance, capacitance, and power to support circuit analysis and troubleshooting;
- C. convert measurements of physical data into properly labeled and scaled graphs to support circuit analysis and troubleshooting;
- D. interpret and apply technical information contained in construction drawings or schematic diagrams; and
- E. interpret circuit analysis and information gathering instructions (function, materials, and schedule) and execute those instructions.

To achieve the learning outcomes, the student will or will be able to:

(The letter designations at the end of each statement refer to the learning outcome(s).)

1. measure current, voltage, resistance, and power in dc circuits; (A,B)
2. calculate energy, power, voltage, current, resistance, and cost of energy in dc circuits; (A, B, C)
3. construct electric circuits which fulfill the specifications given in a schematic diagram; (C)
4. troubleshoot dc circuits to locate shorts, opens, and overloads; (C, D)
5. measure inductance, capacitance, impedance, and phase shift; (B)
6. identify components used in ac circuits as to type, rating, and application; (D) and
7. analyze complex circuits by reducing them to equivalent circuits. (D, E)

Course Requirements: Complete all homework assignments, lecture tests, lab assignments and final exam.

Revised: 05/01/2017

Course Grading Scale:

90 – 100 = A
80 – 89 = B
70 – 79 = C
60 – 69 = D
0 – 59 = F

Attendance Policy: The college attendance policy is available at <http://www.bpcc.edu/catalog/current/academicpolicies.html>

Course Fees: This course is accompanied with an additional non-refundable fee for supplemental materials, laboratory supplies, software licenses, certification exams, and/or clinical fees.

Nondiscrimination Statement: Bossier Parish Community College does not discriminate on the basis of race, color, national origin, gender, age, religion, qualified disability, marital status, veteran's status, or sexual orientation in admission to its programs, services, or activities, in access to them, in treatment of individuals, or in any aspect of its operations. Bossier Parish Community College does not discriminate in its hiring or employment practices.

Title VI, Section 504, and ADA Coordinator
Sarah Culpepper, Coordinator
Disability Services, D-110
6220 East Texas Street
Bossier City, LA 71111
Phone: 318-678-6539
Email: sculpepper@bpcc.edu
Hours: 8:00 a.m.-4:30 p.m. Monday - Friday, excluding holidays and weekends.

Equity/Compliance Coordinator
Teri Bashara, Director of Human Resources
Human Resources Office, A-105
6220 East Texas Street
Bossier City, LA 71111
Phone: 318-678-6056
Hours: 8:00 a.m.-4:30 p.m. Monday - Friday, excluding holidays and weekends.
